DETAILED ACTION

1. This communication is in response to applicant's amendment filed November 24, 2006.

Election/Restrictions

2. Applicant's election without traverse of invention I, claims 1-14 in the reply filed on November 24, 2006 is acknowledged. Claims 1-14 and 17-28 are currently presented for examination.
3. Applicant's response to requirement for election of species within the claims in invention I is further acknowledged and modified as follows:

Election of Species

4. This application (invention I) contains the following patentably distinct species:

Species A: Represented by the embodiment described on page 4 line 30 – page 5 line 2 in which digital rights are transmitted wirelessly to a multimedia playback unit and rights analysis unit.

Species B: Represented by the embodiment described on page 4 line 30 – page 5 line 2 in which digital rights are transmitted directly from an attached storage unit to a multimedia playback unit and rights analysis unit.
5. The species are patentably distinct because they are mutually exclusive. The rights are either being transmitted wirelessly from a remote unit or not

Art Unit: 3621

6. Applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

7. Applicant are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

9. Should Applicants traverse on the ground that the species are not patentably distinct (e.g. Applicants may argue that Species A is not patentably distinct from Species B), Applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103(a) of the other invention.

Art Unit: 3621

10. A telephone call was made to applicant's attorney on or about February 19, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

11. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. §1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. §1.48(b) and by the fee required under 37 C.F.R. §1.17(i).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 571-272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.
